AICTE FlowGuard

Institutional Dashboard & End-to-End Application Tracking
SIH26262 | Master Implementation Prompt for Google AI Studio

A structured build specification covering the applicant portal, 22 application categories, APH-grounded document requirements, scrutiny, EVC, decisions, appeals, compliance, security and testing.

Regulatory principle: use verified, versioned rules traceable to the APH. Keep statutory decisions under authorised human control. Label simulations and unresolved requirements.

PART 1 — MANDATORY RULES

Source of truth

Use the attached AICTE Approval Process Handbook 2024–2027 (APH) as the primary regulatory source and the APH Document Requirements Matrix as an index. Verify every requirement against the PDF before enabling it. Preserve exact clause/annexure references, applicability, signatory/issuing authority, validity/deadline, workflow stage, source version and verification status. Never invent requirements, deadlines, validity periods, routes or statutory powers. Mark unresolved requirements NEEDS_VERIFICATION. Distinguish APH rules from software choices and approved operational policies. Execute only verified and approved deterministic rules.

Human authority

Automate administrative checks and coordination, not statutory approval/rejection or expert judgement. Uploading a file is not proof of substantive compliance. Do not fabricate committee findings or decision letters. Not every application follows every committee stage.

Technology

Use React, TypeScript, Tailwind CSS, the supported Node.js server runtime in Google AI Studio, Supabase PostgreSQL, Supabase Auth and private Supabase Storage. Keep privileged credentials server-side. Label simulations clearly and never claim real AICTE integration without authorised working access.

PART 2 — INSTITUTIONAL DASHBOARD

After authenticated login, route the INSTITUTION_APPLICANT to one institutional dashboard. Restrict records to their authorised institution.

Sidebar: Dashboard Overview; Institution Profile; Start New Application; My Applications; Document Centre; Deficiency Notices; Re-scrutiny Updates; EVC Visit Schedule; EVC Information; Decisions and Official Communications; Appeals; Compliance and Undertakings; Notifications; Audit/Application Activity; Help and Support; Logout.

Dashboard cards: Total Applications; Draft; Submitted; Under Scrutiny; Deficiencies Requiring Action; Under Re-scrutiny; Awaiting EVC; EVC Scheduled; Awaiting Post-EVC Review; Awaiting Decision; Decisions Issued; Appeals Pending; Compliance Actions Due. Counts come from the database; label demo data.

Application table: Application ID, institution, application type, submission timestamp, submitted by, current status/stage, responsible role where disclosure is permitted, latest update, next action, deadline if applicable, last modified timestamp and View Details. Add search, filters, sorting and pagination.

PART 3 — INSTITUTION PROFILE AND NEW APPLICATION

Collect official institution name; complete address; state/district; college/institution ID; applicant full name and designation; official email; contact number if required; authorised signatory details where applicable; Trust/Society/Company or sponsoring organisation details where applicable. Store profile separately from application data. Distinguish software identification fields from APH-prescribed fields.

Provide both a searchable box and dropdown listing all 22 categories in Part 4. Search by partial name/keywords. Show description, APH reference, checklist preview, verified workflow stages, prerequisites and verification status. Load category-specific forms and checklists; do not reuse a generic checklist. Allow drafts while rules are unresolved, but block final submission against an unapproved checklist.

PART 4 — 22 APPLICATION CATEGORIES AND STARTING DOCUMENT CHECKLISTS

These are project-level categories mapped to APH Table 2.3 and relevant annexures. Verify each list against the PDF before execution.

1. EoA — Self-Disclosure

Source: Annexure 2 §2.1 and applicable Chapters I/II/VI.

- Affidavit 2, digitally signed by prescribed Chairman/Secretary or authorised Government/Government-aided representative.
- AICTE portal payment receipt for relevant academic year, if any.

- Valid Occupancy/Completion Certificate, Building License or Form D, as applicable.
- Structural Stability Certificate from registered Structural Engineer when building is more than 30 years from issue of Completion Certificate.
- Valid Fire Safety Certificate.
- Satellite map with latitude/longitude at main-building entrance.
- Audited previous-year accounts of Trust/Society/Company.
- Specified competent-authority letter for qualifying Government buildings older than 50 years where original documents cannot be submitted.

Do not invent a universal Fire Safety Certificate expiry period.

2. Introduction/Continuation of NRI Seats

Source: Annexure 2 §2.2.

- Trust/Society/Company resolution approving NRI seats, in Format 3 and signed by prescribed Chairman/Secretary. Verify any distinct continuation requirements.

3. Diploma-to-Degree or Degree-to-Diploma Conversion

Source: Annexure 2 §2.3 and applicable Chapter II provisions.

- NOC from affiliating University/Board in Format 2.
- Format 3 resolution approving conversion, signed by prescribed Chairman/Secretary.
- State Government NOC where the APH requires it before the academic session.
- Other documents only where verified provisions apply.

Do not automatically require all Annexure 1 documents; §2.3 expressly applies them to Change of Site/Location.

4. Change of Institution Name

Source: Annexure 2 §2.10 and Chapter I §§1.5.4–1.5.5.

- NOC from affiliating University/Board in Format 2, or the official-sealed receipt permitted by APH as proof of submission.
- Format 3 resolution approving name change, signed by prescribed Chairman/Secretary.
- Applicable Chapter I conditions.

5. Introduction of New Programme or Level

Source: Annexure 2 §2.3 and applicable Chapter II/III.

- NOC from affiliating University/Board in Format 2.
- Format 3 resolution approving programme/level and resource allocation where required.
- State Government NOC where specifically applicable.
- Programme-specific prerequisites from relevant APH provisions.

Resolve programme, level and institution type before final checklist generation.

6. Merger of Institutions

Source: Annexure 2 §2.4 and Chapter II clause 2.10.2(b).

- Applicable Annexure 2 documents, subject to the explicit exception in clause 2.10.2(b).
- NOC from affiliating University/Board in Format 2.
- Format 3 merger resolution.
- Applicable legal merger documents when different Trusts/Societies/Companies are involved.

Never evaluate the exception by guesswork.

7. Break in EoA, Restoration or Hibernation

Source: Annexure 2 §2.1 and applicable Chapter II.

Use the self-disclosure checklist where the route requires it: Affidavit 2; applicable portal receipt if any; valid occupancy/completion/building document; Structural Stability Certificate when age condition applies; valid Fire Safety Certificate; satellite map with coordinates; audited previous-year accounts; qualifying Government-building exception letter. Verify applicability for the specific case.

8. FN/OCI/Gulf Children Supernumerary Seats

Source: Annexure 2 §2.5.

- Hostel facilities and administration details.
- Format 3 resolution approving supernumerary seats, signed by prescribed Chairman/Secretary.
- OIA coordination where required.

9. Increase in Intake or Additional Courses

Source: Annexure 2 §2.6 and relevant programme provisions.

- Affidavit 8 on ■100 non-judicial/e-stamp paper sworn before First Class Judicial Magistrate, Notary or Oath Commissioner, subject to the Extended EoA exception.
- Format 3 resolution approving additional courses/divisions and allocation of land/building/funds.
- Verified programme-specific documents.

10. Integrated or Dual Degree Programme

Source: Annexure 2 §2.6 and applicable programme provisions.

- Affidavit 8 with prescribed form/stamp/attestation, subject to exceptions.
- Format 3 resolution approving programme and resource allocation.
- Other requirements expressly prescribed for the programme.

11. Introduction/Continuation of FPM

Source: Annexure 2 §2.6 and applicable FPM provisions.

- Affidavit 8 subject to the Extended EoA exception where applicable.
- Format 3 resolution.
- Proof of faculty with Ph.D./Fellow qualifications according to seat count as prescribed.
- Other FPM-specific documents from applicable provisions.

12. Course Name Change, Merger, Reduction or Closure

Source: Annexure 2 §2.9 and Chapter II §2.18.

- Format 3 resolution approving the applicable action.
- For closure, NOC from affiliating University/Board in Format 2 with arrangements for existing students.
- Other documents required by applicable clauses.

For closure, track application validity for the duration of the respective course under §2.18(f).

13. Collaboration and Twinning

Source: Annexure 2 §2.14 and Chapter III §3.2.

- Foreign partner authorised-signatory letter confirming recognition/equivalence in parent country.
- Trustee letter on fees and intake per course.
- Trustee and foreign-partner letter covering admissions, entry qualification, fees, examination/evaluation and parent-country procedure.

- Trustee letter specifying semesters in India/abroad.
- MoU/bipartite agreement between foreign and Indian partners.
- Agreement between Indian institution and affiliating University/Board.
- Affidavit 11 including arrangements for students unable to obtain visas.
- Attested proof of similar qualification offered in parent country.
- Foreign partner letter stating degree awarded only in parent country.
- Valid NBA certificate or NIRF ranking within Top 200 for relevant courses.
- Format 3 resolution approving programme.

Do not invent universal expiry periods for MoUs or letters.

14. Change of Site/Location

Source: Annexure 2 §2.3 and Chapter II §2.17.

- All Annexure 1 documents as expressly required for this category.
- NOC from affiliating University/Board in Format 2.
- Format 3 resolution.
- Applicable land/building/ownership/lease/plan/occupancy/fire-safety documents.
- Additional §2.17 requirements.

Separate new-site requirements from conditional ownership/lease requirements. Track EVC infrastructure verification and any required Council approval before shifting equipment/library resources.

15. Closure of Institution

Source: Annexure 2 §2.7.

- NOC from affiliating University/Board in Format 2 with arrangements for existing students.
- Latest salary sheet showing pay scale, gross pay, PF deduction and TDS for faculty/non-teaching staff.
- Faculty:student ratio.
- RPGF/Joint FDR details with AICTE.
- Student status; faculty/staff status and liabilities.
- Affidavit 4 on ■100 non-judicial/e-stamp paper sworn before prescribed authority stating no liability for faculty/staff/students.
- Pending court cases, serious charges, norm violations and ragging cases.
- Format 3 closure resolution.

16. Women's-to-Co-ed or Co-ed-to-Women's Conversion

Source: Annexure 2 §2.3 and applicable Chapter II.

- NOC from affiliating University/Board in Format 2.
- Format 3 conversion resolution.
- State Government NOC where required.
- Additional documents specifically prescribed for the conversion direction/type.

17. Closure of Programme(s)/Course(s)

Source: Annexure 2 §2.9 and Chapter II §2.18.

- NOC from affiliating University/Board in Format 2.
- Clear arrangements for existing students.
- Format 3 closure resolution.
- Other expressly required documents.

Track course-duration validity; do not confuse programme closure with institution closure.

18. Change of Bank Details

Source: Annexure 2 §2.12.

- Notarised Affidavit 9 from Chairperson/Secretary stating reasons.
- Format 3 resolution approving change.
- If due to bank merger, bank NOC/certificate confirming merger, subject to Government notification.

Restrict bank information to authorised roles and mask sensitive details.

19. Change of Trust/Society/Company Name or Address

Source: Annexure 2 §2.13 and applicable Chapter I.

- Approval from applicable Charity Commissioner/Registrar for name/address change or merger.
- Notarised Affidavit 10 stating no commercial/business angle.
- Certified registration document listing members, objectives, MoA and Rules.
- Recommended Board of Governors details under Annexure 17 where applicable.
- Section 8 non-profit MoA/Rules where applicable.
- Land documents/lease deeds in new entity name.
- Registered transfer/conveyance deed for merger where applicable.
- Working capital evidence under Chapter I §1.5.3: applicable FDs or latest bank statement in new entity name plus Bank Manager certificate.
- Trustee/member-name change approval where applicable.
- Format 3 resolution with reasons.

20. Change of Institution Type / Conversion into a University

Source: Annexure 2 §2.8 and applicable Chapter IV/UGC.

- NOC from affiliating University/Board in Format 2.
- Format 3 resolution approving change of type/conversion and course arrangements where applicable.
- Relevant Chapter IV/UGC requirements.
- Other legal/institutional documents only after verification.

Respect the APH exception concerning Affidavit 2 for change of type.

21. ODL/OL Courses

Source: applicable Chapter V and UGC-linked requirements.

Extract and verify the complete checklist from APH and referenced authoritative regulations/forms. Do not reuse a generic Annexure 2 checklist. Until verified, mark NEEDS_VERIFICATION, allow draft saving and block final submission against an unapproved checklist.

22. Establishment of a New Technical Institution

Source: Annexure 1 and applicable Chapter I.

Scrutiny-stage documents

- Building Plan (Certificate 2) prepared by an architect registered with Council of Architecture/Licensed Surveyor under Certificate 1 and approved by competent State/UT authority.
- Affidavit 2 on ■100 non-judicial/e-stamp paper sworn before prescribed authority.
- Applicant organisation resolution in Format 3.
- Applicable Occupancy/Completion Certificate, Building License or Form D; prescribed undertaking if building incomplete.
- Valid Fire Safety Certificate.

- Bank Manager Certificate 3 on financial status.
- Prescribed hard copy of uploaded application.
- Certified Trust/Society/Company/PPP/BOT registration documents.
- Annexure 17 Board of Governors details for standalone PGDM where applicable.
- Section 8 non-profit documents where applicable.
- PPP/BOT resolution where applicable.
- Land ownership evidence in applicant organisation's name; applicable lease-duration evidence and Joint Affidavit 7.
- Notarised English translation of vernacular land documents.

Conditional private land lease documents

- Original registered lease.
- Land conversion certificate.
- Lessor title documents.
- Encumbrance Certificate within source-prescribed timing.
- Lessor resolution where applicable.
- Registered right to assign lease for sublease where applicable.
- Compliance with restriction on mortgaging land.

Conditional private building lease documents

- Approved complete building plan and leased-floor plans if partial floors.
- Occupancy/completion certificate.
- Land title/leasehold documents and registered lease.
- Valid Fire Safety Certificate.
- Educational Land Use Certificate.
- Topographical/village map with survey numbers and road map.
- Architect-certified floor plans/sections/elevations and room/carpet-area table.
- Working capital evidence and Bank Manager certificate.
- Audited accounts for last three years where applicable.
- Minority status certificate where applicable.
- Detailed Project Report.
- High-tension-line undertaking/safety certificate where relevant.
- Qualifying Government-building exception letter.

EVC-stage evidence

- Recruitment advertisement in at least one National Daily for Principal/Director and faculty.
- Internet bandwidth evidence.
- Library titles/volumes.
- Equipment and book invoices/cash memos.
- Journal subscription details under Annexure 4.
- Sanctioned electrical load.
- Architect certificate for sewage disposal, barrier-free environment, accessible toilets and all-weather approach roads.
- Details of other institutions run by the same organisation.
- Approximately 30-minute facilities video uploaded to YouTube with URL submitted through the prescribed process, where applicable.

Post-LoA

Track faculty and Principal/Director appointments and prescribed staff information. Do not imply courses may commence before required appointments and prerequisites are met. Track LoA validity of two academic years where applicable.

PART 5 — DOCUMENT UPLOAD AND VALIDATION

Dynamic checklist fields: document ID/name; APH reference; mandatory/conditional status; applicability reason; accepted formats/configured size limit; issuing authority/signatory where specified; issue/expiry date where relevant; submission/validation status; filename; upload timestamp; version; reviewer remarks; deficiency status.

Validate file type and size server-side. Use private storage and expiring signed URLs.

Document statuses: NOT_UPLOADED, UPLOADED, AWAITING_VALIDATION, VALIDATION_IN_PROGRESS, VERIFIED, DEFICIENCY_FOUND, REPLACEMENT_REQUESTED, REPLACEMENT_SUBMITTED, REVALIDATION_PENDING, ACCEPTED_FOR_WORKFLOW, REQUIRES_HUMAN_REVIEW.

Check document presence, file metadata, applicable dates, supported digital-signature verification, identifiers, structured-field discrepancies and duplicates where data is reliable. A visible signature image is not cryptographic verification. Do not use generative AI to determine compliance.

PART 6 — APPLICATION ID AND SUBMISSION RECORD

Generate unique server-side IDs such as FG-2026-000001; this is a FlowGuard ID, not an official AICTE number. Preserve institution/category/applicant details, submitted-by identity, UTC submission timestamp and configured display timezone, stage/status, checklist/rule version, submitted document versions, confirmation reference and audit history. Provide a FlowGuard receipt clearly distinguished from an official AICTE receipt. Prevent silent editing after final submission.

PART 7 — APPLICATION TIMELINE

Display timestamp, stage, event description, status before/after, responsible role where disclosable, action, applicant action required, deadline/source and communication reference. Possible events include draft, submission, scrutiny, deficiency, replacement, re-scrutiny, EVC referral/scheduling/completion, report submission, clarification, decision, appeal and compliance events. Not every application uses all events. Do not expose restricted internal deliberations.

PART 8 — DEFICIENCY AND RE-SCRUTINY

Each deficiency records ID, application/category, discovery stage, affected document/field, type, explanation, APH reference, classification, detected/communicated timestamps, reviewer role, corrective action, deadline/source, status and history. Types include missing, expired/invalid, incomplete, signature issue, mismatch, inconsistent fields, incorrect format, missing conditional document and human review.

Applicant can view notice, upload replacement, add permitted response, submit for re-scrutiny and track status. Preserve old versions. Re-scrutinise changed documents and dependent rules plus any APH-required checks. Route onward only after authorised checks.

PART 9 — EVC VISIT

Display visit/application reference, institution/address, physical/online type, date/time/timezone, location or authorised meeting details, committee members subject to disclosure rules, agenda, preparation instructions, evidence to make available, authorised contact, scheduling timestamp, reschedule/cancel status and reason. Notify after authorised schedule changes. Do not fabricate member identities or findings. Track visit completion, report/evidence receipt and post-EVC status; hide restricted deliberations.

PART 10 — POST-EVC REVIEW AND DECISION

Authorised reviewers examine report completeness, findings, evidence references, deterministic checks, missing/conflicting evidence, clarifications and audit history. When a decision is released, display actual recorded outcome, decision type/status/date/time, authority where disclosable, reference number, recorded reasons, conditions, compliance deadlines, appeal eligibility/deadline and official communication.

Support LoA/LoR/LoD only where meaning/applicability is confirmed. Never generate fake statutory decisions or infer decision reasons from rule failures. Mark simulated documents.

PART 11 — APPEALS AND SEVEN-DAY WINDOW

The identified APH provision, Chapter II §2.24(a), states an appeal to the Council must be made within seven days from the date the EC decision is uploaded. Verify exact applicability. Use the correct trigger, not notification-read time.

Store original decision/application references, upload timestamp, rule/version, calculated deadline and calculation details, appeal submission time, grounds, evidence, receipt/reference, assigned body, status, hearing details if applicable, communications and outcome. Display countdown and timezone. Disable after deadline only where verified procedure requires; do not invent exceptions.

Do not automatically route every appeal through both SHC and SAC. Implement the verified route for each decision/application. Display permitted appeal status updates.

PART 12 — COMPLIANCE

Show obligation/condition reference and source, related application/decision, action/evidence, responsible institution role, due date/source, submission timestamp, verification status, outstanding deficiencies and permitted reminder/escalation history. Track validity only where supported by source rules or authorised operational policy. Use REQUIRES_HUMAN_REVIEW when uncertain.

PART 13 — NOTIFICATIONS

Provide in-app notifications and configurable email for submission, ID, scrutiny, deficiencies/deadlines, responses, re-scrutiny, EVC schedule changes, visit completion, clarification, decision, appeal and compliance. Record recipient/event/timestamp/channel/delivery status/application/deadline. Use idempotency to avoid duplicates and distinguish generated notifications from delivered emails.

PART 14 — DATABASE

Create normalised Supabase/PostgreSQL tables for institutions; user_profiles; institution_user_memberships; application_types; applications; application_submissions; aph_sources; aph_rule_versions; document_requirements; document_submissions; document_versions; document_validation_results; workflow_definitions; workflow_transitions; application_stage_history; deficiency_notices; deficiency_responses; evc_visits; evc_assignments; evc_reports; evc_evidence; review_actions; decision_records; official_communications; appeals; compliance_obligations; compliance_submissions; notifications; audit_events. Use keys, constraints, indexes and timestamps. Keep critical audit events append-only. Store private file references, not public URLs. Enforce institution-level isolation and server-side authorization.

PART 15 — WORKFLOW ENGINE

Possible software states: DRAFT; SUBMITTED; SCRUTINY_PENDING; SCRUTINY_IN_PROGRESS; DEFICIENCY_ISSUED; CORRECTION_SUBMITTED; RE_SCRUTINY_PENDING; RE_SCRUTINY_IN_PROGRESS; EVC_REFERRAL_PENDING; EVC_PENDING; EVC_SCHEDULED; EVC_COMPLETED; REPORT_REVIEW_PENDING; CLARIFICATION_PENDING; DECISION_PENDING; DECISION_ISSUED; APPEAL_SUBMITTED; APPEAL_UNDER_REVIEW; APPEAL_DECIDED; COMPLIANCE_PENDING; COMPLIANCE_COMPLETED; CLOSED. These are not official APH terminology. Define application-specific routes and do not force all applications through all states.

For each transition validate state, actor permissions, prerequisites and approved rules; record actor/time/action/reason; update status; create tasks/notifications; preserve history; reject invalid transitions server-side.

PART 16 — APIs

Implement documented APIs for institution profile; category search; draft creation; application detail; dynamic checklist; secure upload/download authorization; final submission; timeline; deficiency retrieval/response; replacement documents; re-scrutiny status; EVC details; decisions/communications; appeal eligibility/deadline and submission; compliance obligations/submissions; notifications/acknowledgement. Applicants cannot change official findings, decisions, workflow status or rule versions.

PART 17 — UI QUALITY

Professional, responsive and accessible design; keyboard navigation; consistent terminology/status colours; clear empty/loading/error states; distinguish draft, uploaded, verified and accepted. Include searchable selector, multi-step form, Save Draft, Review Before Submission, confirmation, downloadable summary, replacement workflow, timeline, deficiency centre, EVC details, decisions/appeals and compliance tracker. Do not build a disconnected generic upload page.

PART 18 — TESTING

Test institution profile; all 22 categories; correct/conditional checklists; unique ID; timestamp/attribution; secure upload/versioning; missing/expired checks; signature status; deficiency notifications; deadline source; replacements/re-scrutiny; EVC scheduling; report review; authorised decision; seven-day calculation; correct SHC/SAC routing; compliance reminders; RBAC/data isolation; audit integrity; invalid transition rejection; session expiry; notification retry/idempotency. Use labelled mock data. Do not claim tests pass unless run.

PART 19 — IMPLEMENTATION ORDER

Phase 1: dashboard shell/navigation/profile.

Phase 2: searchable 22-category selector and dynamic forms.

Phase 3: verified APH requirements and secure document centre.

Phase 4: submission, unique ID, receipt and timeline.

Phase 5: deficiencies, replacements and re-scrutiny.

Phase 6: EVC schedule and notifications.

Phase 7: post-EVC review and decision communications.

Phase 8: appeal eligibility, seven-day deadline and verified routing.

Phase 9: compliance, reminders and audit history.

Phase 10: security testing and refinement.

Start with Phase 1 and proceed incrementally. At each phase report files, actual features, database changes, configuration, tests and results, unresolved APH questions and remaining work.

FINAL GOAL: Deliver a functional, secure, traceable Institutional Dashboard to file/track applications, resolve deficiencies, receive EVC and decision updates, submit eligible appeals and monitor compliance. Automate administrative coordination and verified deterministic checks without replacing statutory authority or claiming unauthorised AICTE integration.
